Home: Auf der Hube 2, 35041 Marburg (Germany)

ABOUT ME

A highly motivated and results-driven **Python Developer** with a solid background in **Artificial intelligence,** complemented by hands-on experience in **Front-end** and **Odoo** development.

EDUCATION AND TRAINING

M.Sc. Data Science

Philips-Universität Marburg [04/2026 – Current]

Informatics Engineering - Artificial Intelligence

Tishreen University [2019 – 2024]

Country: Syria | **Final grade:** 75.8%

Thesis:
Object Detection by Drones (UAV)

- Developed an object detection system using YOLO, trained on the MS COCO dataset for robust object recognition.
- Adapted the YOLO model to a UAV dataset through transfer learning for aerial object detection.
- Utilized PyTorch for model design and training, optimizing real-time detection capabilities

Semester Project: Image Captioning

- Developed an image captioning model using the Flickr8k dataset, integrating convolutional neural networks (CNNs)
- and recurrent neural networks (RNNs) to generate descriptive captions for images.
- Implemented preprocessing and feature extraction techniques to optimize model performance.

WORK EXPERIENCE

Deeptorch – Syria

AI developer Intern

[2023 – 2024]

- Learned advanced principles of statistics and probability, applying them to enhance machine learning models.
- Worked on an object detection project, coding YOLO v1 and v2 from scratch, gaining a deep understanding of neural network architectures.
- Developed and implemented data analysis projects, focusing on data cleaning, data mining, and preprocessing to improve data quality and model performance.

IRAM – Remotely, United Arab Emirates

Python/Odoo developer

[02/2024 – 09/2024]

- Attended the BTCO **(Backend Technical Consultant Onboarding)** course, gaining in-depth knowledge of Odoo architecture, module development, and best practices for customization and deployment.
- Developed and customized Odoo modules (v15, v16, v17):

- Created Odoo module for Security Cameras that fetches data automatically from multiple sources.
- Created Odoo module for fetching data from a Revit add-in which I also made using C#

Gluetron – India

Address: Remotely , (India)

Front-end Developer

[03/2023 – 10/2023]

- Developed and maintained multiple front-end projects, using latest technologies and best practices.
- Collaborated with Back-end developers, UI/UX designers, Team leaders ensuring seamless integration among the team.

Freelancer – Syria

Front-end Developer

[2020 – 2025]

– Syria

ICPC Contestant

[2020 – 2023]

- Solved over 400 problems on Codeforces and Leetcode.
- Competed at Universities level demonstrating exceptional problem-solving skills.
- Collaborated within a team under strict time constraints to solve complex coding challenges, showcasing the ability to work effectively in high-pressure, competitive environments.

SKILLS

Python / C++ / Pytorch / TensorFlow / OpenCV / Pillow / Pandas / Scikit-learn / Matplotlib / SQL / PosgreSQL / Git (Github / Gitlab) / OOP / RESTful APIs / GraphQL / Odoo / HTML / CSS / JavaScript / TypeScript / React.js / Next.js / Redux / Bootstrap / Tailwind CSS / SASS / Data Structures / Problem Solving

PROJECTS

AI - Facial Emotion Detection in Real Time

- This project is dedicated to the advancement of facial emotion recognition through the implementation of cutting-edge deep learning methods such as Haar-Cascades and Convolutional Neural Networks (CNNs)

Link: https://github.com/majd-abed/Faical-Emotion-Detection-in-Real-Time

AI - Security System for Cameras

- Developed a security camera system using YOLO v8 for object detection and FaceNet for facial recognition, enhancing surveillance capabilities.
- Integrated the model with security cameras to provide real-time detection and recognition in various environments.

Closed Source

AI - Object Detection using Drones (UAV)

- Developed an object detection system using YOLO, trained on the MS COCO dataset for robust object recognition.
- Adapted the YOLO model to a UAV dataset through transfer learning for aerial object detection.
- Utilized PyTorch for model design and training, optimizing real-time detection capabilities

Link: https://github.com/majd-abed/UAV

Front-end development projects

- For a detailed showcase of my front-end development work, please visit my portfolio at **https://majdabed1.github.io**

HONOURS AND AWARDS

IBM
Data Analysis with Python
